

Posters

- Maximilian Assig **Development of a scanning tunneling microscope for measurements down to 15 mK**
- Cord Bertram **Island growth of D₂O on Ag(111)**
- Marcus Blab **Ultra compact multi tip scanning probe microscope with an outer diameter of 50 nm**
- Deung-Jang Choi **Engineering negative differential conductance in a single-C₆₀ tunnel junction**
- Martina Corso **Exploring short range interactions between two neutral molecules**
- Andreas Eich **STM studies on the ternary topological insulator PbBi₄Te₇**
- Mostafa Enayat **Setup of the milliKelvin spectroscopic imaging STM**
- Johanna Flock **THz spectroscopy of sub-wavelength structures with a scattering scanning near field optical microscope**
- Norman Fournier **Force-controlled lifting of molecular wires**
- Héctor González-Herrero **Point defects in graphene systems**
- Benjamin Heinrich **Probing individual spin states of Fe-Porphyrins on a superconductor**
- Tobias Herden **Combined scanning tunneling and atomic force microscopy at low temperatures**
- Steffen Kahle **Addressing the quantum magnetism of individual manganese-12-acetate molecular magnets anchored at surfaces**
- Sujoy Karan **Harnessing electro spray deposition in ultra-high vacuum for scanning tunneling microscopy**
- Georgy Kichin **STM tip modification for high resolution force imaging**
- Philipp Kloth **Investigation of quantum-well states in thin copper films by the use of an STM**
- Stefan Korte **Electrical transport measured with a multi tip STM**
- Sören Krotzky **Two different routes of combining graphene and white graphene - Direct growth vs. transfer**
-
- Jincheng Li **Light emission from lifted conjugated polymer**
- Christian Lotze **Dynamic force spectroscopy at the single molecule junction**
- Jesús Martínez-Blanco **Local spectroscopy in the field emission regime on the InAs(111)A surface**
- Jörg Meyer **LT-STM investigations on aza-BODIPY**
- Toshio Miyamachi **Kondo effect in self assembled molecular chains**
- Mathias Neu **qPlus-based low-temperature STM/AFM: Design and first experiments**
- Anja Nickel **STM measurements on subphthalocyanine nanowheels**
- Jenny Oberg **How the local environment affects the magnetic anisotropy and Kondo screening of a high-spin atom**

Posters

- Niko Pavliček **Design and construction of an STM head for application in high magnetic fields**
- Ivan Pentegov **Shot noise measurements in a low temperature STM**
- Henning Prüser **Probing the scattering behavior of single magnetic and non-magnetic bulk impurities**
- Michael Schackert **Orientation dependent Kondo resonance on single antiferromagnetic binuclear molecules**
- Eike Oliver Schäfer-Nolte **Development of a diamond-based scanning probe magnetometer with single spin sensitivity**
- Verena Schendel **Electronic characterization of adatoms and molecules by quantum point contact microscopy**
- Stefan Schmaus **The giant magnetoresistance of individual molecules**
- René Schmidt **Characterization of magnetic probes used for magnetic exchange force microscopy and spectroscopy**
- Natalia Schneider **Light emission from a double-decker molecule on a metal surface**
- Benedikt Schweflinghaus **Search for homochiral magnetic structures along the step edge of Pt(664)**
- David Serrate Donoso **Spin, orbital and energy resolved Co atomic states**
- Erwin Smakman **Manipulation of charge and configuration of a single Si atom with a scanning tunneling microscope tip and light**
- Sebastian Standop / Carsten Busse **Ion beam induced defects in graphene**
- Anna Stróżecka **Tuning the spin state of manganese phthalocyanine by coordination of CO molecule**
- Cormac Toher **SPM studies of organic solar cell components**
- Tobias Umbach **Adsorption dependent charge state of self-assembled acceptor and donor-acceptor complexes on Au(111)**
- Saranyan Vijayaraghavan **Site-specific adsorption and manipulation of fullerenes on cerium double-decker complexes**
- Christian Wagner **Dissecting an organic-metal bond by molecular manipulation**
- Seth White **Tunnelling spectroscopy (SI-STM) study of Fe(Se,Te)**
- Chii-Bin Wu **The spin structure of Mn on Co/Cu(001) studied by SP-STM with bulk Cr tip**
- Zechao Yang **Metal-organic porous networks on surfaces investigated by STM**
